

To whom it may concern .I have used Gilbertson PVC nestboxes for several years. They are the easiest on the market to use and are very acceptable to BLUEBIRDS I would never use any other nest box on my trails. I very Highly reccomend them

Hi Steve

At long last here is the check for the boxes I owe you. I'm so sorry it's taken me so long to get this to you.

I hope all is well with you. My count so far for the year is 330 if they all make it. Still a couple new nests with no eggs - 1 with only 1 egg and several with 3. So we'll see what those end up producing in the next week. Almost all are in your boxes since I only use yours and a few Trayers. So Thanks again for all you've done for me - I'd never be fledging this many birds without you!

Take care

Larry
