Dear Mr. Gilbertson,

As I have told you already, you are an absolute genius. I admire your patience and dedication in devising a sparrow proof nesting box. I purchased three just a short time ago and already bluebirds inhabit all three. Until now, I have had a heck of a time with sparrows taking over the bluebird boxes and I am delighted to have found a solution to this problem. I must admit that I was a little intimidated by the drawings of your box on the internet but I cannot imagine a box that is any easier to put up and monitor, I simply love them and they are very attractive to boot. And then there is the trap – again a wonderful creation, very easy to use and most effective. I could not believe how quick and easy it was to install and I ridded three boxes of their pesky inhabitants in no time.

Enclosed you will find a check for 3 additional boxes. I am getting rid of the wooden boxes that the dreaded sparrows find irresistible. Thank you again on behalf of the bluebirds.

Yours sincerely,
Margaret
