Dear Steve,

Thank you for sending the nestboxes. They are ingenious. I'm hoping for good luck with them next year. I'm not sure I have the best habitat for bluebirds. The day after I put them up, four bluebirds (2 m, 2 f) spent the morning here but moved on. They were the first bluebirds I ever saw here, so for a few hours I was amazed at the drawing power of your nestboxes. Maybe some other species will like my habitat better. Thanks for sending the boxes so quickly and sorry for being so slow in paying. If you want to see your birdhouses, and maybe a bear, stop by. 218. Thanks again.

PS: I was excited on June 2 when someone pointed out a prairie warbler to me and I photographed it. That was a lifer for me.

PS: The starlings left and I haven't seen one for a month.
